67 code changes!

CDT 2027:
Preorder and
Save 20%

Old codes slow you down. More importantly, they slow down reimbursements and cause frustration in the practice. But when your team understands the latest CDT updates, they can better **document and report procedures for each patient, reducing the risk of rejected claims and costly delays.**

The **CDT 2027 and Coding Companion Kit with App** has **67 code changes** (even more than 2026!):

- 28 new codes
- 33 revisions
- 6 editorial changes

New and revised codes include:

- placement of a direct resin-based composite crown, anterior or posterior
- removal of a screw-retained indirect restoration on an implant
- placement of a healing cap
- repairing or removing a fixed splint
- implant- and abutment-retained interim fixed dentures for the partially edentulous arch . . . and many more!

In addition to providing the most up-to-date codes, the CDT 2027 Kit also features:

- access to the CDT e-book plus the mobile and web app.
- full suite of CDT codes and descriptors.
- ICD-10-CM codes for dental procedures.

Preorders begin June 1.*

Save 20% when you order CDT 2027 Kit by June 19 using promo code 26705.

**Shipping starts on September 16, 2026.*
